DRUPAL

WWW.DRUPAL.ORG

Drupal is a free and open source content-management framework. Drupal has participated in Google Code-In and Google Summer of Code various times. Both Drupal and contributed modules have benefited greatly from its long-time involvement with the Google programs for pre-university and university students.

GOOGLE CODE-IN

OPEN SOURCE DEVELOPMENT

ORGANIZATIONS

Open source organizations that have participated in a previous Google Code-in or Google Summer of Code program are eligible to apply to be mentoring organizations for Google Code-in.

STUDENTS

Upon successful completion of tasks, eligible students can earn prizes (digital certificates, t-shirts, hoodies) and grand prize winners will receive a trip to Google's headquarters in Mountain View, California .

Google Code-in is a contest to introduce pre-university students (ages 13-17) to open source software development. Since 2010, over 3200 students from 99 countries have completed work in the contest.

GOOGLE SUMMER OF CODE

OPEN SOURCE DEVELOPMENT

ORGANIZATIONS

Open source projects apply to be mentor organizations. Once accepted, organizations discuss possible ideas with students and then decide on the proposals they wish to mentor for the summer. They provide mentors to help guide each student through the program.

Google Summer of Code is a global program focused on bringing more student developers into open source software development. Students work on a three month programming project with an open source organization during their break from university.

DRUPAL

LOCAL MEETUPS

Drupal™ Groups

Local Drupal meetups are being organized regularly to organize, plan and work on projects. There are a large number of communities who oraganises these meetups on regular basis.
